

# CV Mies Frijling

Mies Frijling was born in 1947 in Delft in the Netherlands.

All her life she has been drawing.

When she was 19 she went to the Royal Academie of Visual Arts in Den Haag.

After the education, she went working at a bank, because there was no other possibility.

The last years of her working life she started to draw and paint again and after she stopped working this was what she wanted to do most.

In her own neighbourhood she had her first exhibition.

Every year she organises a Art route through the ward where she lives. (Presikhaaf, Arnhem, Netherlands).

At the moment, she went back to her roots, and started drawing again.

## CV Mies Frijling
